SUMMARY

Backend & DevOps Engineer with 2+ years building Python microservices, CI/CD pipelines, and cloud infrastructure on Azure. Experienced in Django, FastAPI, IIS Server, and Azure DevOps. Delivered production systems for SEO SaaS platforms serving real client traffic.

EXPERIENCE

- Infidigit** Goregaon, Mumbai
Oct 2023 - Present
 - Engineered end-to-end Stripe Payment Gateway integration (Checkout, Billing APIs, webhooks) within a Django application, enabling recurring subscription billing and automated lifecycle event handling reducing manual payment processing effort by 30%.
 - Designed and delivered an automated Google Analytics 4 & Google Search Console data retrieval system, progressing from POC to full production deployment and reduced manual data extraction and report creating time by 60%.
 - Built and deployed a FastAPI-based keyword research application on IIS that delivers real-time search volume data and keyword discovery, reducing manual data collection from external sources by 50%.
 - Deployed and configured 5+ Django applications on Windows Server 2022, including full IIS setup, SSL/TLS certificate configuration, and environment management achieving 99% + application uptime post deployment.
 - Developed reusable internal utility libraries standardizing API communication, structured logging, and error handling across 5+ microservices, cutting cross-team integration time by 40%.
- Infidigit** Goregaon, Mumbai
Jul 2022 - Sept 2023
 - Associate Engineer
 - Manage clients' websites with a focus on improving visibility through SEO technical implementation.
 - Enhance user experience and customize development to meet individual client needs.
 - Successfully manage over 15+ projects in the past year, demonstrating the ability to handle multiple tasks simultaneously
 - Serve as the primary point of contact for clients, ensuring smooth communication and personalized support.

PROJECTS

- Lex Assist AI — AI Legal Document Assistant:** Built a RAG-based legal document assistant for PDF upload and semantic search using local LLMs, pgvector embeddings, FastAPI streaming backend, and a React frontend with real-time chat; deployed on Azure with Docker and CI/CD.
Tech Stack: Python, FastAPI, React, PostgreSQL, pgvector, Docker, Azure DevOps, RAG, Ollama

PROGRAMMING SKILLS

- DevOps & CI/CD:** Azure DevOps (Boards, Repos, Pipelines, Artifacts, Test Plans), GitHub Actions, Git
- Cloud Platforms:** Microsoft Azure, Google Cloud Console
- Programming & Scripting:** Python (Django, FastAPI, Flask), Bash, PowerShell
- Containerization & Servers:** Docker, IIS Server, NSSM
- Databases:** MySQL, PostgreSQL
- Monitoring & Automation:** Log Monitoring, Custom Alerting Systems, Error Tracking
- Automation & Utilities:** Selenium, BeautifulSoup, Acronis Data Protection

EDUCATION

- YCOUM University** Maharashtra, Mumbai
2019
 - Bachelor of Computer Applications
- Maharashtra Board** Maharashtra, Mumbai
2016
 - Higher Secondary Certificate
